Default Ingress Controllers

Developed and maintained by a company that provides a full Kubernetes platform (and often support in managing it).

Pros

Top reasons a default Ingress controller could be right for you

- ▲ **Free or Low Cost**
- ▲ **Reliable**
- ▲ **Supported**

Ideal when...
You're using a Kubernetes platform and are just getting started, in testing, or low-volume production.

Cons

Top reasons a default Ingress controller could be wrong for you

- ▼ **Infrastructure Lock-In**
- ▼ **Basic Features**
- ▼ **Unpredictable Time or Money Costs as You Scale**

Consider "open source" or "commercial" options to outweigh these cons.
